SUMMARY

Full-stack developer with a front-end focus, experienced in building production-ready web applications. Comfortable working across the stack, with a strong interest in performance, maintainability, and accessible, responsive user interfaces.

WORK EXPERIENCE

Freelance Web Developer

Self-Employed   **November 2022 - Present, Abuja, Nigeria**

- Delivered responsive, accessible websites for clients, managing frontend development from initial build through deployment.
- Reduced load times by 20% through targeted performance improvements, resulting in a 45% increase in user retention.
- Reviewed and optimized client sites with Google Lighthouse, maintaining 90+ performance and accessibility scores.

STEM & Coding Instructor

Ignite STEM Africa (NYSC)   **November 2021 - November 2022, Abuja, Nigeria**

- Taught foundational programming concepts using block-based tools, helping students build logical thinking and problem-solving skills.
- Designed and delivered instructional materials using locally available resources to support clear, visual understanding of technical concepts.
- Managed classrooms effectively, maintaining a focused environment that supports steady learning progress.

Intern

Niger State Bureau of Statistics   **June 2019 - November 2019, Minna, Nigeria**

- Collaborated with staff across departments to properly understand data handling processes.
- Reviewed incoming data to identify collection errors and likely causes, reducing time spent on manual data cleaning.
- Prepared validated datasets and summaries for quarterly reports, ensuring accuracy before use in planning.

PROJECTS

Papermrks

papermrks.vercel.app • November 2025 - December 2025

- Built a minimalist, local-first bookmarking web app using TanStack Start, Dexie, and Prisma, designed for fast access and offline-first use.
- Implemented core features including AI-assisted auto-tagging, bulk actions, metadata re-fetching, collection management, cloud sync, and command-based search across bookmarks.
- Designed reliable auto and manual sync flows to keep local and cloud data consistent while maintaining a responsive user experience.

Vorcle

vorcle.vercel.app • June 2025 - August 2025

- Built a full-stack meeting productivity application using Next.js 15, React, and Prisma, helping users capture summaries, transcripts, and actionable insights from meetings, with integrations for Jira, Asana, and Trello.
- Implemented core features including calendar-based event tracking, automatic meeting participation, structured action items, AI-generated summaries and email reports, and searchable meeting history.
- Improved performance and user experience through lazy loading, integrating payments via Polar, and building a responsive, conversion-focused landing page.

EDUCATION

Mathematics (Statistics)

Federal University of Technology, Minna • Niger state, Nigeria • 2016-2021

SKILLS

HTML, CSS, Typescript, React.js, Next.js, Node.js, Express.js, Git, MySQL, PostgreSQL, MongoDB (NoSQL)
